

Dear Trivs Friends & Families,

While we are ecstatic, we are able to open our doors to you again we want you to feel safe first and foremost. The welfare and protection of our guests and staff at Trivs is our first priority. Therefore, we wish to share with you the precautions we are continually taking to improve circumstances that have found us all compromised and vulnerable.

- All employees are working by choice, none of our employees are mandated to work.
- We are taking temperatures of each employee before they enter the building and every five hours thereafter. Any employee with a temperature of 99.7 degrees or higher will be sent home.
- All required employees have face masks.
- Employee safety training is continuing, highly emphasizing proper handwashing, glove use, and proper hygiene practices.
- Our staffing levels have decreased, and employees are required to remain six feet apart as much as possible.
- We are continuing to follow the regulations in the Ohio Uniform Food Safety Code and standards developed by the Governor's Restaurant Advisory Group.
- We are ensuring a minimum of the requested six-foot distance between guests to achieve safe social distancing guidelines.
- We are providing greatly heightened cleaning and sanitizing of all common areas and surfaces, i.e., counter/bar tops, doorknobs, handles, handrails, menus, drink lists, monitors, keyboards, phones, radios, drink rails, chairs, tables, doors, armrests, buttons, etc., throughout the day.

- We have added touchless motion sense faucets and sanitizing products in restrooms and high traffic locations. These products are all visible and accessible.
- All cleaning products used have been selected to insure they possess proper disinfecting qualities to provide enhanced sanitization.
- We have implemented a cleaning agent called MICROSHEILD 360. This agent is an EPA registered and FDA approved cleaning means that is safe for direct food contact surface cleaning. This agent not only disinfects every hard surface in our establishment but prevents any pathogens to survive for up to a year at a time. (MicroShield360.com)

We thank you for your continued support and hope to see you in the restaurant or for curbside carryout soon!

Mike Trivisonno & Staff
